Conversation Engagement Indicators

Indicator	Score	Classification	Explanation
-----------	-------	----------------	-------------

Confidence	48.1/100	Moderate	Reasonable fluency with some hesitations and occasional long pauses affecting confidence.
Engagement	55.1/100	Moderate	Moderate engagement with some active moments and reasonable conversational contribution.
Hesitation	34.6/100	Moderate	Some hesitation detected, suggesting occasional uncertainty or pauses for thought.
Curiosity	52.9/100	Moderate	Moderate curiosity â€” some questions and engagement with the subject matter.
Attentiveness	52.2/100	Moderate	Generally engaged but with noticeable lapses in consistency.

Questions Detected (107)

1. but did you all, were you all able to connect with
2. Yeah, do you all, does anybody have like a regular sink
3. still are those all been canceled?
4. Or is there a whole second?
5. next and get ups on kube con. Does that sound right? Yeah. Yeah. That's where we were last I heard.
6. can you comment on the issue that,
7. One is over what timeframe are we looking at?
8. lunch where we're saying basically since 13.0,
9. what kind of big improvements have we made?
10. because we're having an event, right?
11. What kind of announcements do we make?
12. okay, like what started in the last year
13. what would be coming out of beta?
14. when we started a beta program in this last year,
15. what would be announcing is GA at commit?
16. So what do you think, Sydney?
17. and plug them in here?
18. And are we trying to hit three per stage?
19. But can I show what I did for SCN just to get some general
20. feedback on it?

Recommendations

-
- Practice replacing filler words with deliberate pauses to improve perceived confidence.
 - Address complex topics earlier in the conversation to reduce moments of uncertainty.
 - Reinforce trust-building through structured, confident communication patterns.
 - Increase vocal variety and active participation to signal higher engagement.

Transcript Excerpt

I can record. And we don't have a ton of items to get to. And I might be able to do one that might be fun if we have a little bit of time. So corporate events, I think I saw a little, I put this in Slack and I saw a little bit of kind of noise around it, which was good. The nutshell here is as we've kind of restructured and tried different things, the event support that we need isn't as nailed down as it needs to be. So the current tactic that we're going with is go-to-market team signs up and kind of of sponsors that event. So you supported the PMM, your campaign manager, does the campaigns for that event, et cetera, et cetera, et cetera. I don't see anyone in the, maybe there are comments in the issue. I don't see the header updated yet. I thought we had in Slack sort of farmed each one of them out. That's, so I guess the next, So it looks like Ty put in some folks. It looks like this looks good so that, let's see, needs support from GTM teams. So I guess the ask would be to work with your GTM teams. So let me ask, I saw some slack, I think an R slack, but did you all, were you all able to connect with like your GTM teams. Unslagged only and on the issue actually. Yeah, so I'm not in real time, but you know, source feedback. I got one person to respond so far. So it may end up Cindy being you and I just picking the one that we wanna do. And then they can back us up. If we don't get any more feedback. Yeah, do you all, does anybody have like a regular sink still are those all been canceled? Or is there a whole second? I'll have a rehearsal. Yeah, we're on like the two week cadence. OK. Yeah, GitHub's has been canceled after the enablement. Cool. So I'm just trying to catch up with the thread. So it looks like maybe a platform on reinvent CI-CD on Google next and get ups on kube con. Does that sound right? Yeah. Yeah. That's where we were last I heard. Cool. So then I think we can help the core prevents team. They do a lot of cat hurting and keep on tracking people down. So I think if this team can take the mission to try to help I'll track that down. So if you get the commitment specifically from your campaign managers, hey, like we're signing up for a coupon, can you comment on the issue that, yes, I can commit to this, et cetera, et cetera, et cetera, so that just so that they can get that event support. But that looks good and I appreciate thanks for the link to SOMI on the rolls. Product announcements. So I appreciate Brian for adding this. I probably should edit it, but. I had two questions about that one. One is over what timeframe are we looking at? So in theory, this could be the same as the GILAB 14 lunch where we're saying basically since 13.0, what kind of big improvements have we made? I'm not totally sure of all of the kind of the interplay here, but I think this is kind of the general gist of this assignment is okay, we have commit coming up. We have some amount of like we have a stage, you know, a metaphorical stage to say somethi ... [full transcript available in the web app]
