Conversation Engagement Indicators

Indicator	Score	Classification	Explanation
-----------	-------	----------------	-------------

Confidence	47.0/100	Moderate	Reasonable fluency with some hesitations and occasional long pauses affecting confidence.
Engagement	54.6/100	Moderate	Moderate engagement with some active moments and reasonable conversational contribution.
Hesitation	35.9/100	Moderate	Some hesitation detected, suggesting occasional uncertainty or pauses for thought.
Curiosity	52.1/100	Moderate	Moderate curiosity â€” some questions and engagement with the subject matter.
Attentiveness	52.2/100	Moderate	Generally engaged but with noticeable lapses in consistency.

Questions Detected (105)

1. but did you all,
2. were you all able to connect with your GTM teams?
3. Yeah, do you all, does anybody have like a regular sync
4. still are those all been canceled?
5. Is that sound right?
6. That's where we were last I heard.
7. you know, can you comment on the issue
8. One is over what time frame are we looking at?
9. So, in theory, this could be the same as the Gilep 14-Lunch where we're saying basically
10. since 13.0, what kind of big improvements have we made.
11. Right? What kind of announcements do we make?
12. and say, okay, like what started in the last year,
13. what would be coming out of beta, right?
14. what would be announcing is GA at commit.
15. I see a couple of had now, so what do you think, Sydney?
16. And are we trying to hit three per stage?
17. could be notable, but I can I show what I did for SCN just to get some general feedback on it and
18. Like Windows 11 or anybody who's well and stuff out,
19. But actually when I looked around,
20. that's pretty much how everybody does a big launch.

Recommendations

-
- Practice replacing filler words with deliberate pauses to improve perceived confidence.
 - Address complex topics earlier in the conversation to reduce moments of uncertainty.
 - Reinforce trust-building through structured, confident communication patterns.
 - Increase vocal variety and active participation to signal higher engagement.

Transcript Excerpt

I can record. And we don't have a ton of items to get to. And I might be able to do one that might be fun if we have a little bit of time. So corporate events, I think I saw a little, I put this in Slack and I saw a little bit of kind of noise around it, which was good. You know, the nutshell here is as we've kind of restructured and tried different things. The event support that we need isn't as nailed down as it needs to be. So the current tactic that we're going with is go to market team, signs up and kind of sponsors that event. So you support as a PMM, your campaign manager does the campaigns for that event, et cetera, et cetera, et cetera. I don't see anyone in the, maybe they're comments in the issue. I don't see the, the header updated yet. I thought we had in Slack sort of farmed each one of them out. That's, so I guess the next, so it looks like Ty put in some folks. It looks like like this looks good so that let's see, it's apart from GTM teams. So I guess the ask would be to work with your GTM teams. So let me ask it, I saw some slack, I think it's R slack, but did you all, were you all able to connect with your GTM teams? On slack only and on the issue actually. Yeah, so I'm not in real time, but it sort of feedback. I got one person to respond so far. So it made up Cindy being you and I just picked in the one that we want to do and then they can back us up. If we don't get any more feedback. Yeah, do you all, does anybody have like a regular sync still are those all been canceled? There's their case. I'm not sure if I have a regular sync. Yeah, we're on like the two week cadence. OK. Yeah, GitHub has been canceled after the in-event. Cool. So I'm just trying to catch up with the thread. So it looks like maybe a platform on reinvent CICD on Google Next and GitHub's on CoupCon. Is that sound right? Yeah. Yeah. That's where we were last I heard. Cool. So then I think we can help the core events team. They do a lot of like cat hurting and you know keep on tracking people down. So I think if this team can take the mission to like try to help track that down. So if you get the commitment specifically from your campaign managers, hey, like we're signing up for a coupon, you know, can you comment on the issue that yes, I can commit to this, et cetera, et cetera, et cetera. You know, so that just so that they can get that that that that that that support, but that looks good and I appreciate thanks for the link to you, Simon on the rules. Product announcements. So I appreciate, Brad, for adding this I probably should add it, but I had two questions about that one. One is over what time frame are we looking at? So, in theory, this could be the same as the Gilep 14-Lunch where we're saying basically since 13.0, what kind of big improvements have we made. Um, can't really, this is always a little bit tough and I'm, and I'm, I am not totally sure of all of the, kind of the interplay here, but I think, I think this is kind of the general jus ...
